

INDUSTRY & DEFENSE ROUNDTABLE

MITRE's Industry & Defense Roundtable brings together the defense industrial base (DIB) and the government to address national security priorities. The Roundtable provides a center of gravity for the industrial base supporting national security missions.

Today's national security cross-cutting goals and ambitions require engagement from many stakeholders that comprise the defense industrial base. The Roundtable works to align and underscore opportunities to use industrial and commercial sector technologies and knowledge to advance mission objectives. Government and industry are able to achieve cost and time savings that apply to the acquisition process.

The FFRDC construct provides the Roundtable opportunities to explore and enable non-traditional solutions for government and industry. As an operator of FFRDCs, MITRE is a technical advisor to industry and government, providing independent and unbiased guidance.

To learn more about the Roundtable contact Director and Chair Dr. Angela O'Hanlon, amcintee@mitre.org or visit industryanddefense.mitre.org
